FUJAIRAH TERMINALS

Navigating the Future of Trade and Logistics Together

PART OF
AD PORTS GROUP

Welcome Message From Our CEO

Since its inception in 2017, Fujairah Terminals has been firmly committed to developing modern facilities that best serve our customers across all our business verticals.

Part of AD Ports Group, the region's premier facilitator of logistics, transport, and trade, we have a wealth of maritime, logistics and technological expertise behind us, with practices that are in line with international standards.

Fujairah Terminals is emerging as a premier gateway to the Indian subcontinent, African trade lanes as well as global markets thanks to the fulfillment of our long-term strategy to invest heavily in our infrastructure: extending our quay wall, deepening our draft, increasing yard and warehousing capacity, and advancing operational equipment.

We look forward to sharing the next chapter of Fujairah Terminals' success story with you.

Captain Mohamed Al Yahyaei
CEO of Fujairah Terminals

Our Story

In June 2017, Fujairah Terminals was established as part of a 35-year concession agreement between AD Ports Group and Fujairah Port. The Group has been strategically developing the Port's infrastructure and operations to enhance its capabilities, and international and regional positioning in relation to container business, general cargo, ro-ro and cruise, which are all handled by Fujairah Terminals.

Fujairah Terminals now offers state-of-the-art equipment, deepened berths, more quays and yard capacity, which has increased its ability to handle larger vessels, boosted its handling and storage capabilities and increased tourism through its cruise operations.

Fujairah Terminals is playing a key role in advancing the development of this major economic, commercial and logistics maritime hub in the region, which aligns with the government's economic vision for Fujairah 2040.

AD Ports Group's Fujairah Terminals is looking at its connection to the UAE's Etihad Rail network as a catalyst to increase ties with Asia and Africa to enhance cargo traffic. Now that Etihad Rail has completed the connection of railway through Fujairah Terminals, facilitating trade across the UAE from Fujairah to Ruwais in Abu Dhabi, Sharjah, Dubai and Ras al Khaimah is feasible. Also, this will enhance accessibility of business to overseas markets as well.

Strategic Location

Fujairah Terminals is 70 nautical miles from the Strait of Hormuz, the only multipurpose facility located on the eastern seaboard of the United Arab Emirates. Strategically located between east and west, Fujairah Terminals is ideally placed for both local and international trade.

Serving the GCC region, the Indian subcontinent, the Red Sea and East African regions, as well as neighbouring countries, Fujairah Terminals provides access to world-leading manufacturers of steel, copper, lubricants, cement, pipe and engineering, procurement and construction (EPC) contractors.

With full integratin with Etihad Rail, a regional railway that is in close proximity to one of the largest bunkering hubs in the world, Fujairah Terminals offers intermodal connectivity and convenience, which allows for swift and streamlined delivery turnaround on all its services.

| Our Services

Container

We offer container handling services for general, Out of Gauge (OOG), Dangerous Goods (DG), non-DG and reefer containers, with the ability to supply covered and open container storage space of up to 110,000 sqm, extended bonded warehousing space and 300,000 sqm of yard space. We have an efficient turnaround of 15 minutes, supported by 2 STS cranes, 2 RTG cranes, ship loaders, dock loaders and top loaders. Our current handling capacity is 720,000 TEU.

General Cargo

We have the ability to handle multiple commodities of cargo, ranging from industrial to project cargo, with a general cargo storage capacity of approximately 1.3 million tonnes per year and an open area capacity of 45,000 sqm. We have extended bonded warehousing and covered storage areas.

Our recent expansion has greatly increased the general cargo throughput and the amount of accessible multipurpose area for general cargo - up to 25,000 sqm.

Cruise

Indian Ocean, offering tourists a chance to enjoy Fujairah's natural beauty and cultural attractions.

For cruise liners, our berth capacity allows for two cruise vessels to be docked simultaneously, ample bus and parking capacity, porter service and vessel turnaround services with COVID-19 precautionary measures in place.

Port services for tourists include baggage handling, customs and immigration, medical facilities, money exchange

Ro-Ro

Fujairah Terminals receives roll-on/roll-off vessels, having a dedicated ro-ro berth with a 300 m berth length, 30,000 sqm yard capacity and the ability to handle 5,000 vehicles per annum.

We have introduced a solution-oriented strategy to cater to the growing needs of our customers drawing on the Group's rich experience in moving vehicle volumes and serving global markets.

Storage and Warehousing

Our three warehousing facilities are inside the port and close to the quay wall/berths and can handle multiple general cargo and break bulk commodities. We offer both standard or customised warehousing and storage solutions, including built-in units, open and/or covered storage options. There is also an option for reserved open land storage up to 15,000 sqm for limited periods, all of which are overseen by 24/7 security surveillance.

Leasing

Our land leasing facility allows for competitively priced customised storage units with built in power supply facilities. We can facilitate any maritime, logistics and trading operation from industrial manufacturing to offshore fabrication.
